

TOSHIBA

Toshiba Energy Systems & Solutions Corporation

iBR and High Temp Gas Reactor (HTGR)

Next Generation BWR : iBR

- No Containment Venting even in Sever Accident
- 7-day Grace Period by Double Cylindrical Containment Vessel and Built-in Passive Safety Systems
- Proven Construction Method based on ABWR

Coexist with Local Community
and Provide Excellent Economical Efficiency

HTGR and Heat Storage System

- Supports "harmonization with hydrogen society" and "contribution to various demands" with inherent safety
